1000Mbps PoE Switch

WK-PS305 | WK-PS310

Overview

1000Mbps PoE series switch offers 4/8 1000Mbps PoE ports and 1/2 Uplink Ethernet ports, which provides an affordable PoE solution, empowering your CCTV, and other IP-based devices up to 250m away, to break free from traditional PoE distance limitations. Support for enabling VLAN, Extend, and PD Alive functions through smart DIP switches provides much value to basic networking requirements. You are creating a multi-functional and reliable CCTV network solution.

Features

PoE 250m Long Distance to Extend Network

DIP switch provides Extend mode. PoE ports can transmit data and power up to 250 meters. No further hardware or configuration is necessary, easy-to-use, and cost-saving. Perfect for surveillance camera deployment in large areas.

Smart PoE Watchdog to Detect and Reboot Offline PD Device

All PoE ports enable PD Alive function, which can detect and reboot the offline compliant PoE powered devices.

Port Isolation to Prevent Broadcast Storm

With VLAN mode, all PoE ports only can communicate with uplink ports. Avoid data leakage between each port and prevent broadcast storms from disabling the network.

Fanless Design

Fanless design, to provide you with a quiet working environment, suitable for office, hotel and other application scenarios.

Button			
DIP Switch		VLAN Enable VLAN and PD Alive mode. All downlink ports are isolated but can communicate with uplink ports. All PoE ports enable the PD Alive mode to detect and reboot the offline-compliant PoE-powered devices.	
		Default The transmission distance of the PoE port can be up to 100m with 1000Mbps and disable VLAN, PD Alive mode.	
		Extend Enable Extend and PD Alive mode. The transmission distance of port3&4 (WK-PS305)/ port7&8(WK-PS310) can be up to 250m, but the rate is limited to 10Mbps. All PoE ports enable the PD Alive mode to detect and reboot the offline-compliant PoE-powered devices.
