

# Solar Power Solution

Farmlands | Orchards | Forests | Parks and More

Non-Stop Power Where the Sun Shines

## Challenges

 Complex Wiring

 Hard to Maintain

 Poor System Stability

 Difficult Device Installation and Removal

 Short System Standby Time

 Difficult Event Tracing

## What We Offer

### Remote Management and Maintenance

Control devices centrally, monitor power statistics, receive low-battery alerts, update firmware, and reboot the system via the VIGI app or VIGI Cloud VMS. Enjoy peace of mind, no matter your location.

VIGI Cloud VMS

VIGI App

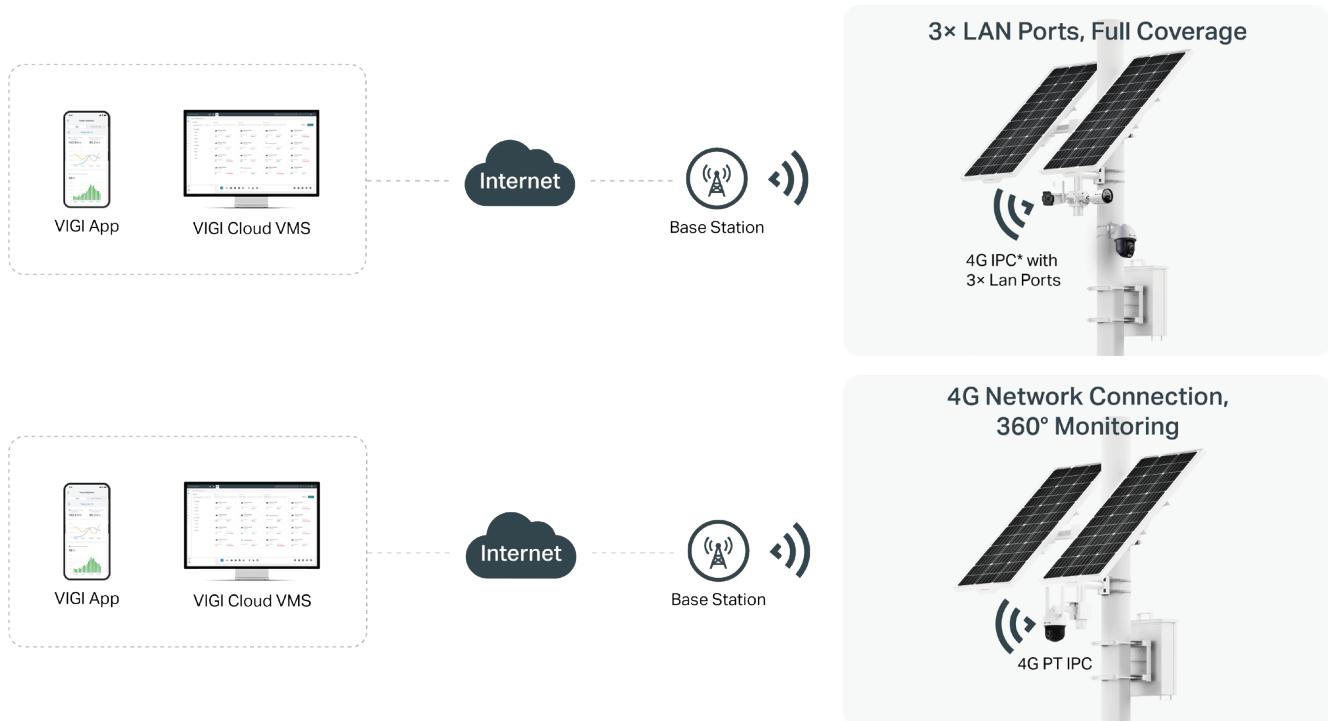

### Customized Assembling

Easily tailor your solar power system with our modular hardware design. Mix and match solar panels, batteries, and onboard devices (3x DC voltage output ports available) to meet your deployment needs freely.

# Flexible Deployment

## 1. 4G IPC-Solar Power Solution

## 2. 4G Router-IPC-Solar Power Solution

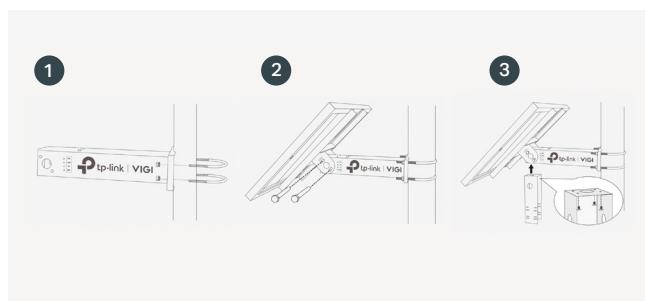

## 3. Wireless Bridge-IPC-Solar Power Solution

# Simple Installation

The modular design allows for quick bracket installation and disassembly within minutes.

# Adjustable Angle

Adjustable angles of 5°, 15°, 25°, 35°, 45°, and 55° ensure optimal alignment and maximum sunlight utilization.

\*The model of the 4G IPC is InSight S345-4G and will be shipped in Q4 2024.

<sup>a</sup>The model of the 4G router is ER703WP-4G-Outdoor and will be shipped in Q4 2024.

## Longer Standby Time

### Industrial-Grade Solar Panel

Grade **A** Solar Panel

**21.6%\*** ↑ Conversion Efficiency

**25+** Year Lifespan

Up to **180W<sup>t</sup>** Optional

### Automotive-Grade Lithium Battery

Up to **93.6Ah** Optional

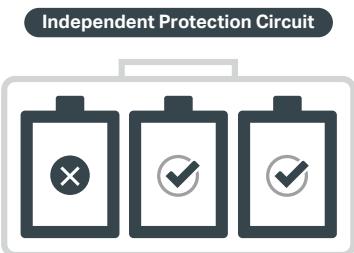

Discharge Efficiency up to **99%**

**> 500** Cycles

Remaining Capacity **> 70%** after 500 Cycles

### Independent Protection Circuit\*\*

Ensures battery safety and uninterrupted device operation.

If a single battery fails,  
other batteries still work normally

If a single battery fails,  
other batteries are at risk of damage

### MPPT Controller Boosts Charging Efficiency

An MPPT (Maximum Power Point Tracking) controller optimizes solar panel power, reduces power loss, and increases charging efficiency by 20% compared to PWM (Pulse Width Modulation) controllers.

MPPT Controller

Increases Charging Efficiency by  
**20%**

PWM Controller

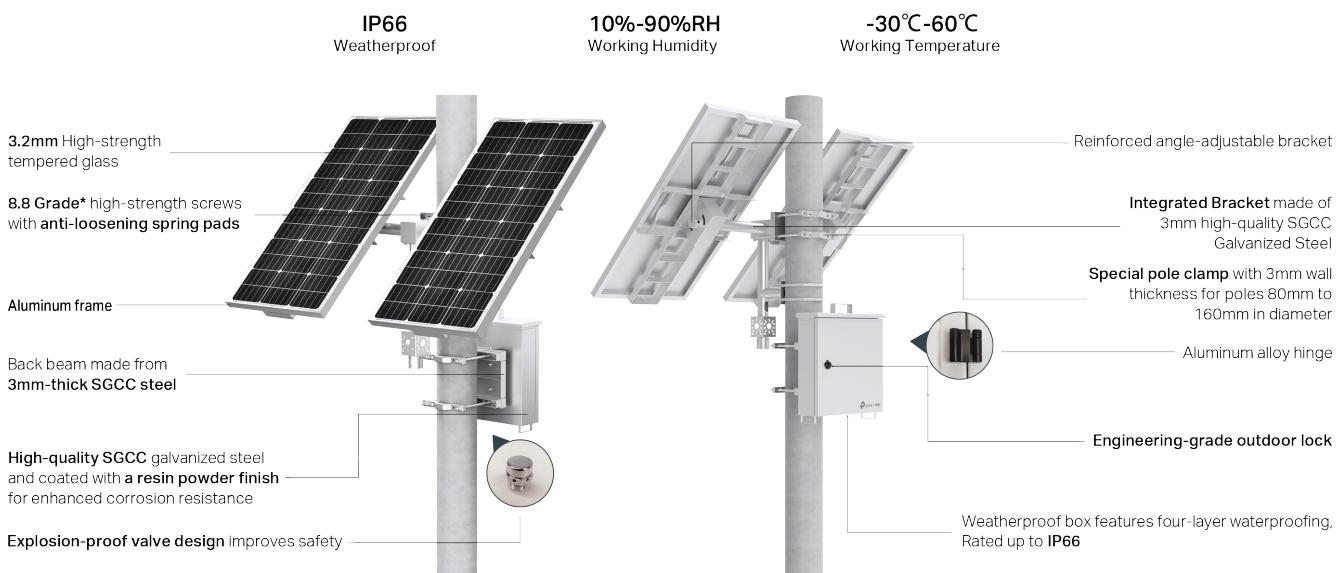

\*This value is compared to the conversion efficiency of polycrystalline silicon solar modules.

\*\*Applicable to VIGI PS90. And VIGI PS90 will available in Q3 2024.

<sup>t</sup>Requires 2\*VIGI Solar Panel 90W.

# High System Stability Reduces Subsequent Maintenance Costs

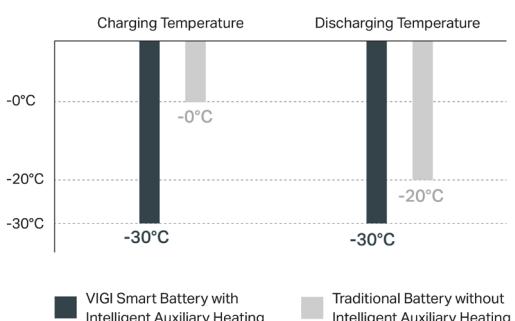

## Enterprise Level Hardware Design

## Intelligent Auxiliary Heating Technology

The built-in smart battery supports intelligent auxiliary heating technology, which allows the battery to operate normally across a wide temperature range.

### Charge and Discharge Temperature Limit Comparison

### Actual Discharge Comparison at the Same Temperature

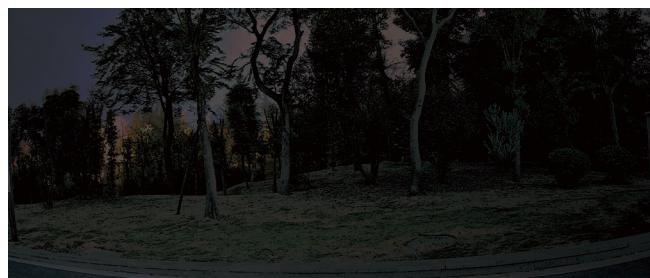

\*The auxiliary heat will only be turned on when the photovoltaic system has a certain input or the battery has a certain amount of power. The test environment consisted of a 20°C aging box and 1A constant current discharge.

## Rapid Incident Handling

In remote areas like orchards and farms, dim lighting at night complicates intruder detection. Delays in reaching the scene may mean incidents are already happening, compounded by complex terrain hindering intruder tracking.

### VIGI AI ISP-Powered ColorPro Image\*\*

Captures colorful and clear images even in ultra low-light conditions without fill lights, enhancing situational awareness.

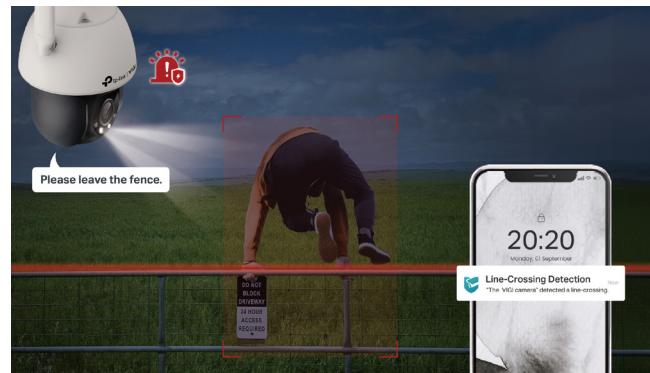

\*Complies with international standard ISO 898-1.

\*\*This feature will be available in Q4 2024.

## Smart Detection

VIGI's smart detection, like intrusion and line crossing, will notify you promptly of any breach, enabling swift action on your part.

## Active Defense

Instantly deter potential intruders with sound and light, proactively protecting your property even when you're away.

## Auto Tracking

Continuously tracks intruders and provides seamless footage. This enables swift comprehension of intruders' paths.

## Typical Applications

Farmlands

Orchards

Forests

Parks

## Other Value Added Highlights

### Trusted Quality

Independent R&D

Superior Suppliers

Vertical Integration

Complete Quality Control

### Superb Pre- and After-Sales Services

Certification and Training (TPSA)

Replacement and Warranty

Localization Support Teams

Dedicated Online Support

Official Community

# Recommended Products

## Solar Power Supply System\*

### VIGI PS90<sup>§</sup>

VIGI Solar System Controller

- 1x/2x/3x 31.2Ah Customized Ternary Lithium
- Independent Protection Circuit
- MPPT Controller
- IP66 Weatherproof

### VIGI Solar Panel 90W

VIGI Solar Panel 90W

- 90W Capability
- Grade A Monocrystalline Silicon
- IP67 Weatherproof

## Network Cameras

### InSight S345-4G<sup>§</sup>

VIGI 4MP Outdoor Full-Color 4G Bullet Network Camera

- 3x LAN Ports to Power Downstream Devices
- 4G Mobile Network\*\*
- 4MP Resolution & Full-Color
- Smart Detection
- Active Defense and Two-Way Audio
- IP66 Weatherproof and On-board Storage\*\*

### VIGI C540-4G

VIGI 4MP Outdoor Full-Color 4G Pan Tilt Network Camera

- 4MP Resolution & Full-Color
- 4G Mobile Network\*\*
- 360° Monitoring & Auto Tracking
- Human & Vehicle Classification
- Smart Detection
- Active Defense and Two-Way Audio
- IP66 Weatherproof and On-board Storage\*\*

## Software Services

### VIGI App

- Remote Management and Maintenance without On-site Presence
- Practical Playback
- Two-Way Audio
- Instant Notifications

### VIGI Cloud VMS

VIGI Cloud Video Management System

- Cloud-Based, Free\* and Unlimited
- Unified Management Across Sites
- Zero-touch Maintenance
- Easy to Deploy

## Solar System Selector<sup>†</sup>

By specifying parameters such as load device power and desired system operating time, select the suitable solar products quickly.

Calculate Total Power Consumption of Load Devices

Type	VIGI Camera
Model	VIGI C345
Average Power Consumption	100
Type	Other
Average Power Consumption	100

**Add**

Select Installation Region

City	New York
Daily Solar Radiation	100

Enter Your Needs

Working Hours	100
Required Working Hours on Consecutive Rainy Days	100
Required on-load Charge on Sunny Days	100

**Calculate**

Calculation Result

Estimated Working Hours on Consecutive Rainy Days	100
Days*	1
Estimated On-load Charge on Sunny Days	100
Days*	1

Recommended Solar Power Supply System Model

Model	Quantity	
Option 1	VIGI SP0200	1
Option 2	VIGI Solar Panel 80W	1
