**HIKVISION**

DS-K1T673 Series
Face Recognition Terminal

Quick Start Guide

UD24653B-K

# Quick Guide

**1 Installation**
- 1.1 Open the box.
- 1.2 Check the environment.
- 1.3 Install the device.

**2 Wiring**
- 2.1 Power supply wiring.
- 2.2 Door lock wiring.
- 2.3 Door contact wiring.
- 2.4 Exit button wiring.
- 2.5 Wiegand wiring.
- 2.6 RS-485 wiring.
- 2.7 Alarm in/out wiring.

**3 Activation**
- Activate the device.

**4 Other Operations**
- 4.1 Quick operation settings.
- 4.2 Authentication settings.

# 1 Installation

## Install with Mounting Plate

### Installation Environment

Keep Away from Magnetic Field | Keep Away from High Temperature | Keep Away from Moisture | Separate Strong and Weak Currents | Avoid Exposing Cables | Backlight | Direct Sunlight | Indirect Sunlight through Window | Direct Sunlight through Window | Close to Light
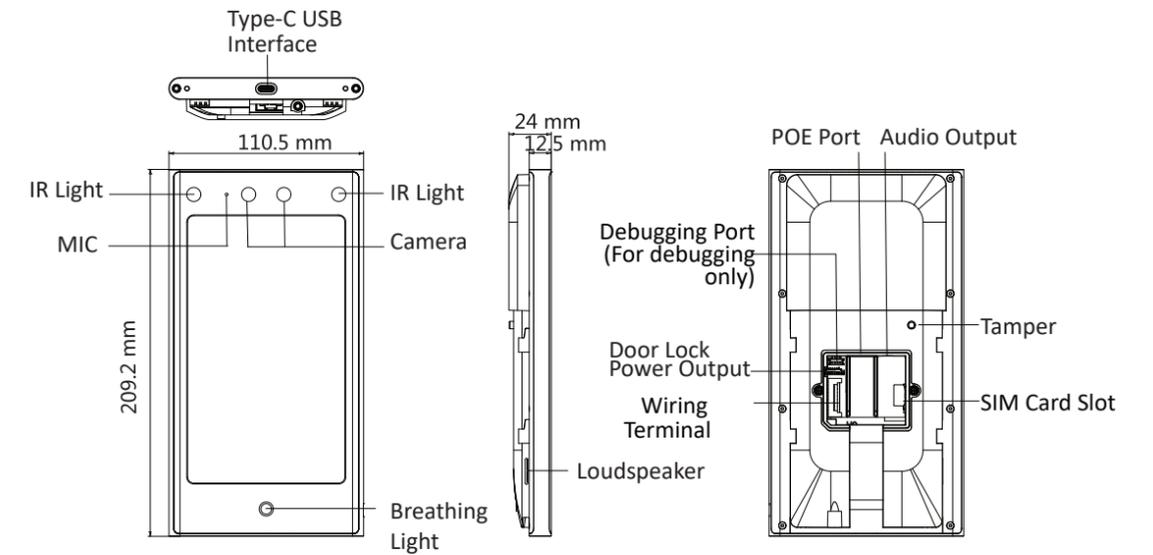

- Avoid backlight, direct sunlight, and indirect sunlight.
- For Better recognition, there should be light source in or near the installation environment.
- The minimum bearing weight of the wall or other places should be 3 times heavier than the device weight.

**Cable Requirements**

| Cable Size | 18 AWG | 15 AWG | 12 AWG |
|---|---|---|---|
| Power Supply | 12 V Switched-mode | 12 V Switched-mode | 12 V Switched-mode |
| Distance Between Power Supply and Device | ≤ 20 m | ≤ 30 m | ≤ 40 m |

Cable Hole

Apply Silicone Sealant

Silicone Rubber Ring
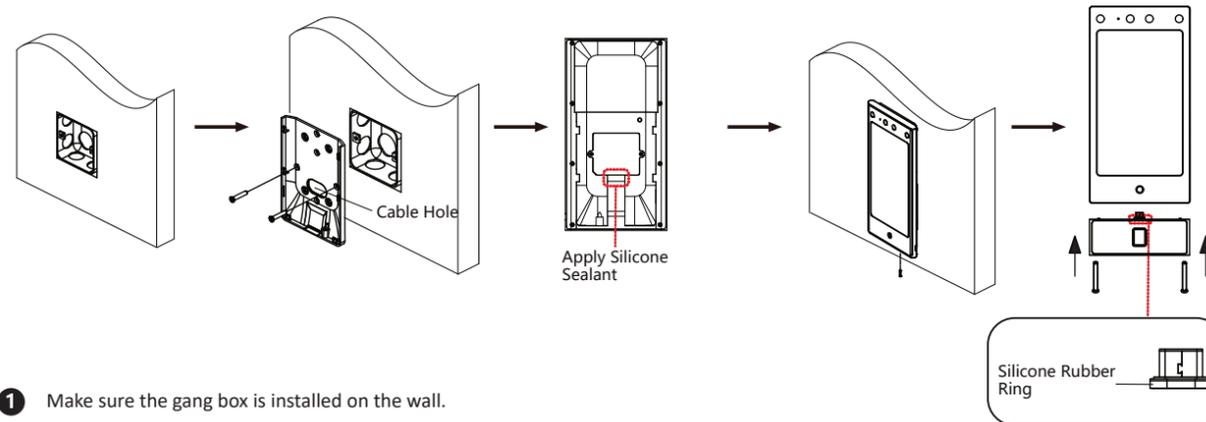

❶ Make sure the gang box is installed on the wall.
- Gang box is not supplied.
- The height of the Gang box can refer to the wall switch standard, and it is about 1.4 m above the ground.

❷ Secure the mounting plate on the gang box with two supplied screws (SC-KM3X8-H2-SUS).

❸ Route the cable through the cable hole, wire the cables and insert the cables in the gang box.
⚠ **Apply silicone sealant among the cable wiring area to keep the raindrop from entering.**

❹ Align the device with the mounting plate, and secure the device on the mounting plate with 1 supplied screw (SC-KM3X8-H2-SUS).

❺ (Optional) According to actual needs, you can connect other modules to the USB interface, and secure them with 2 M3 screws.
⚠ **When inserting an peripheral module, ensure that the silicone rubber ring is intact to prevent rain and other input.**

## Interfaces and Dimension

Type-C USB Interface

110.5 mm
209.2 mm
24 mm
12.5 mm

IR Light | IR Light
MIC | Camera
Breathing Light

POE Port | Audio Output
Debugging Port (For debugging only)
Door Lock Power Output
Wiring Terminal
Loudspeaker
Tamper
SIM Card Slot

ⓘ Only specific models support POE.

## Peripheral Module

Fingerprint + Bluetooth + QR Code Module | Wireless Module (433/868 Mhz) | Alcohol Detection Module

Palm Print and Palm Vein Module | Dual-frequency Card Module (13.56 Mhz and 125 Khz)
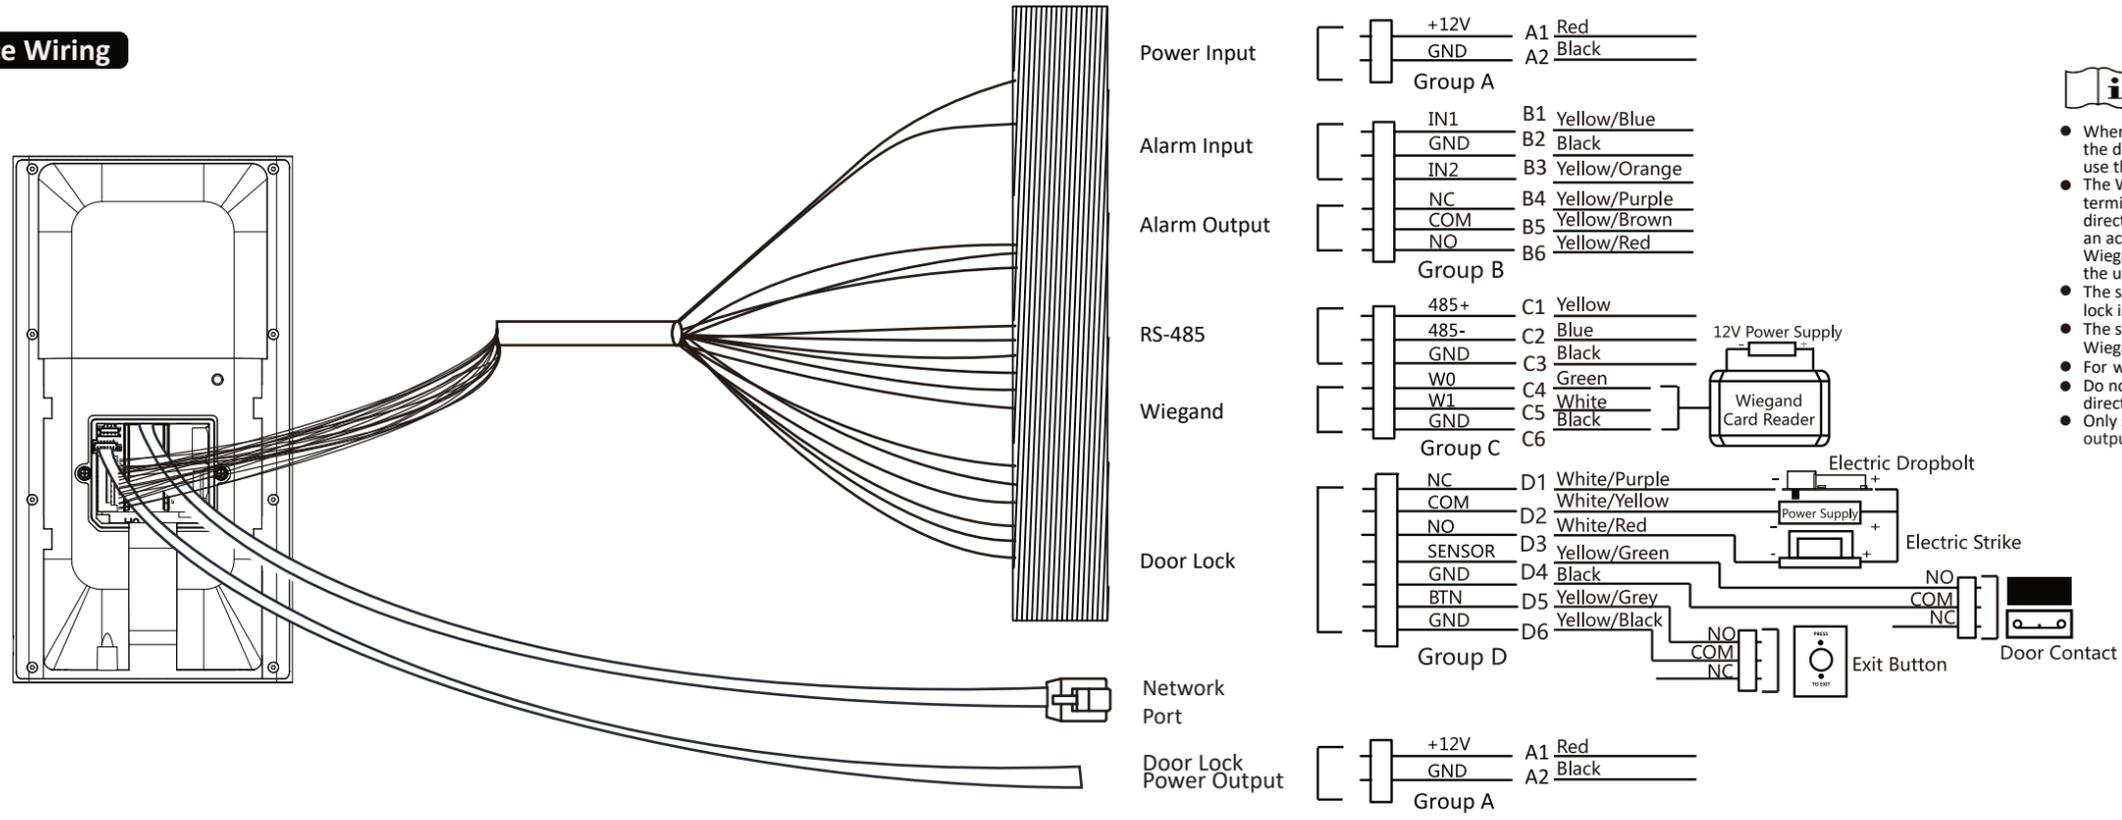

- If the audio plug diameter is greater than 8 mm, an external adapter is required.
- The figures are for reference only.
- The device supports multiple modules, which can be accessed according to actual needs.
- Peripheral modules need to be purchased by yourself.
- Avoid frequent insertion and removal of the blow pistol of alcohol detection module. Replace it immediately if it becomes loose or falls off.

# 2 Wiring

## Device Wiring

| | | | | |
|---|---|---|---|---|
| Power Input | +12V | A1 | Red | |
| | GND | A2 | Black | |
| | | **Group A** | | |
| Alarm Input | IN1 | B1 | Yellow/Blue | |
| | GND | B2 | Black | |
| | IN2 | B3 | Yellow/Orange | |
| Alarm Output | NC | B4 | Yellow/Purple | |
| | COM | B5 | Yellow/Brown | |
| | NO | B6 | Yellow/Red | |
| | | **Group B** | | |
| RS-485 | 485+ | C1 | Yellow | |
| | 485- | C2 | Blue | 12V Power Supply |
| | GND | C3 | Black | |
| Wiegand | W0 | C4 | Green | |
| | W1 | C5 | White | Wiegand Card Reader |
| | GND | C6 | Black | |
| | | **Group C** | | |
| Door Lock | NC | D1 | White/Purple | Electric Dropbolt |
| | COM | D2 | White/Yellow | Power Supply |
| | NO | D3 | White/Red | Electric Strike |
| | SENSOR | D4 | Yellow/Green | |
| | GND | D5 | Black | |
| | BTN | D6 | Yellow/Grey | Exit Button / Door Contact |
| | GND | | Yellow/Black | |
| | | **Group D** | | |
| Network Port | | | | |
| Door Lock Power Output | +12V | A1 | Red | |
| | GND | A2 | Black | |
| | | **Group A** | | |

- When connecting door contact and exit button, the device and the RS-485 card reader should use the same common ground connection.
- The Wiegand terminal here is a Wiegand input terminal. You should set the device's Wiegand direction to "input". If you should connect to an access controller, you should set the Wiegand direction to "Output". For details, see the user manual.
- The suggested external power supply for door lock is 12 V, 1 A.
- The suggested external power supply for Wiegand card reader is 12 V, 1 A.
- For wiring the fire system, see the user manul.
- Do not wire the device to the electric supply directly.
- Only specific models support door lock power output.

# 2 Wiring

## Secure Door Control Unit Wiring

Face Recognition Terminal

Secure Door Control Unit

| RS-485 | 485+ | C1 | Yellow |
|---|---|---|---|
| | 485- | C2 | Blue |
| | GND | C3 | Black |

Secure Door Control Unit Wiring Terminal

Secure Door Control Unit:

| Power Input | +12 V | A1 | Red | +12 V |
|---|---|---|---|---|
| | GND | A2 | Black | GND |
| Sensor Input | SENSOR | B1 | Green/Brown | Door Contact |
| | GND | B2 | Black | |
| Exit Button | BUTTON | B3 | Green/Black | Exit Button |
| | GND | B4 | Black | |
| Lock Output | NC | C1 | White/Purple | (NC) Electric Dropbolt |
| | COM | C2 | White/Black | |
| | NO | C3 | White/Red | Power / (NO) Electric Strike |

- The secure door control unit should connect to an external power supply separately.
- The suggested external power supply is 12 V, 0.5 A.
- For scenarios with high safety requirement, use the secure door control unit wiring first. You can ask the technical support to purchase for the secure door control unit separately.
- The picture here are parts of the wiring. For details, see the secure door control unit's user manual.

# 3 Activation

● **Activation via Device**

After powering on, you will enter the activation page.
*Steps:*
1. Create a password and confirm the password.
2. Tap **Activate** to activate the device.

Characters containing admin and nimda are not supported to be set as activation password.

⚠ STRONG PASSWORD RECOMMENDED–
We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

# 4 Other Operations

● **Steps Afterwards**

After activating, you can select language, set password change type, set network parameters, access to Hik-Connect, set privacy, and set administrator.

● **Log in Home Page**

Authenticate face, card, fingerprint, keyfob, palm print or password, and log in the device to enter the home page.

● **Restore to Factory**

Tap "System Maintenance"-"Restore to Factory". All parameters will be restored to the factory settings. The system will reboot to take effect.
