

**Screen Direct**

**Content Management Software**

A platform to seamlessly create, manage, and update screen content at anytime and from anywhere

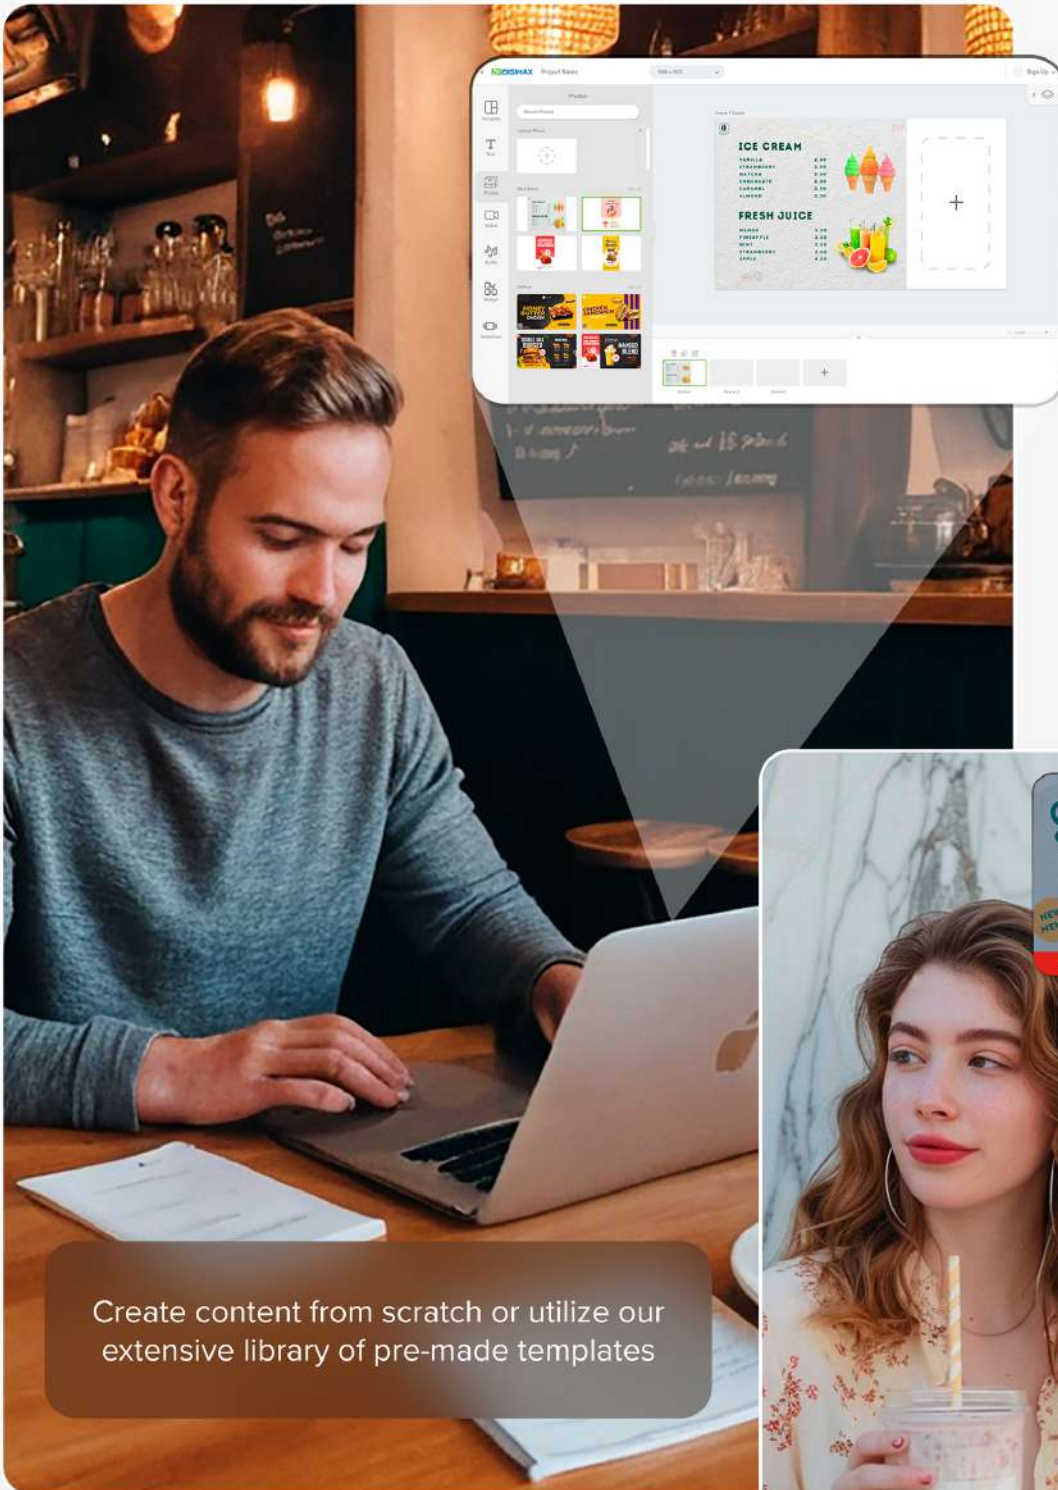

# 01 Flexible Management

The image illustrates the flexibility of the ZK DIGIMAX software. A central laptop displays the management dashboard, which includes a sidebar with navigation options like Dashboard, Settings, Reports, and Inventory. The main area features a map of Indonesia, a 'Current Counts' section with statistics (18, 3585, 468, 3117), and a table of product data. Surrounding the laptop are digital menu boards. One board displays a 'Special Menu BREAKFAST' with items like Caesar Salad, Toast, Bacon & Eggs, and Pancake. Another board promotes 'COLD BREW' coffee with a 30% special promo for ACDC credit card owners. The background is a stylized map with a location pin and a storefront icon.

Manage the software seamlessly,  
anytime, and from anywhere

# 02 Content Creation

Create content from scratch or utilize our extensive library of pre-made templates

# 03 Widget Integration

# 04 Content Deployment and Scheduling
