HIKVISION

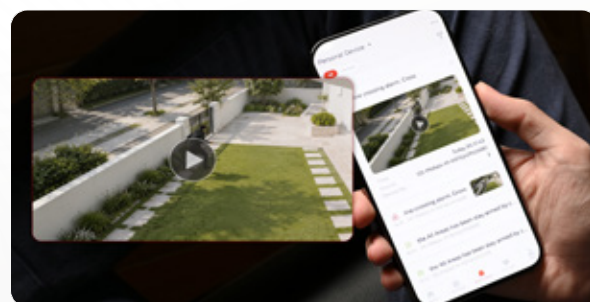

How it works

Taking AcuSense-enabled camera as an example

➤ Add AcuSense-enabled cameras (with pre-configured zone rules) as a detector

➤ Set alarm control panel linkage to the camera

➤ Event triggered by smart camera rules (e.g. line-crossing detection)

➤ Instant visual verification sending to Hik-Connect App and alarm receiving center (ARC)

Smart and Flexible Detection

By taking advantage of diverse smart IP cameras

Precise Alarm Verification to Reduce On-site Visits

Using cameras' event and rules as an alarm zone

Instant and Visualized Alarm Event Notification

Both to Hik-Connect mobile app and ARC
