

Wall-Mounted Network Cabinet (6U/9U)

- Removable side panels for easy installation and maintenance.
- Top and bottom cable entries with blanking plates.
- Top-cover fan cut-out for easy installation.
- Tempered-glass front door opens more than 180°.
- Easy wall mounting.
- Various optional accessories available.

Introduction

The cabinet is a standalone enclosure for housing electrical or electronic equipment. It can provide protection against water, dust and electromagnetic interference. Optional accessories and installation fittings make cabling more convenient and easier to manage, saving time and effort.

These cabinets are commonly used in network wiring rooms, floor telecommunications rooms, main computer rooms, data centres, control centres and monitoring centres.
